Offer Text : <i>Offer No:2686</i>	Our Company is the producer of MULTİGREEN and we would like to make our company and its products known to you. Multigreen, an activated mineral foliar fertilizer with a particle size of 0,1 – 2 µm, is obtained by nanotechnological production method. Since the size of the Multigreen particles is very small (0,1µm-2µm), these particles can be readily absorbed by the stomata of the plants easily. Multigreen particles are then disintegrated within the leaf resulting in the release of				

	carbondioxide (CO2) as well as essential nutrients such as calcium oxide (CaO). If you are interested, we want you to offer preliminary discussions distributor in your country.
